This report has been prepared to complete the response to CIA requirement C-RR3-80,595, requesting a study of SA-3 surface-to-air-missile (SAM) sites identified in the USSR on KEYHOLE photography through [REDACTED]

[REDACTED] Information is provided herein on 32 SA-3 SAM sites deployed in the following locations (Figures 1-5): Moscow (8 sites), Black Sea area (6 sites), Baku (3 sites), the northwestern USSR (8 sites including one probable), and the far eastern USSR (7 sites). An NPIC report in preparation covers SA-3 sites in the Baltic area (25 sites). The SA-3s around Leningrad (18 sites), 1, two SA-3s near Chernyakhovsk and Kedainiai, 2,3 and an SA-3 site near Orekhovo-Zuyevo 4 have been reported on previously. A total of 78 SA-3 SAM sites have been identified in the USSR on KEYHOLE coverage through [REDACTED]

Detailed information on the sites studied

for this report is presented in Table 1. Photographs of the sites are also provided (Figures 6-37) -- in all cases the best-quality coverage available and not necessarily that showing their present status.

Thirteen of the 32 sites are singly deployed, 11 are collocated with SA-2 sites, and 8 (those at Moscow) are collocated with SA-1 sites. Twenty sites have F configurations (including one probable), 3 have G configurations (including one probable), 4 have C configurations, one has an A configuration, and the configurations of 4 sites are undeterminable.

Information provided in this report is intended to update comparable information in NPIC/R-207/63, 5, and in turn data herein are subject to revision in the light of new information and better-quality photography obtainable. Findings presented in this report have been derived solely from KEYHOLE photography.
